Parties Involved
<p>WHO ARE YOU INVESTING WITH?</p> <p>Refer to “The Management and the Administration of the Fund” and “The Trustee” sections of the Fund’s Master Prospectus.</p> <ul style="list-style-type: none"> • The Manager is Eastspring Investments Berhad (company no.: 200001028634 (531241-U)) incorporated in November 2000 and is part of Prudential plc (United Kingdom) group. • The Trustee of the Fund is Deutsche Trustees Malaysia Berhad (company no.: 200701005591 (763590-H)). • The Manager has appointed Eastspring Investments (Singapore) Limited (company no.: 199407631H) as the External Investment Manager. • The Manager and the External Investment Manager are within the same group of companies i.e. Prudential group of companies; therefore there is a possibility of conflict of interest element and/or related party transactions. However, the Manager has in place policies and procedures to deal with any conflict of interest and/or related party situations.
<p>Possible Outcomes of Investing in the Fund</p> <p>Refer to “Risk Factors” in the “Information In Relation to the Fund” section of the Fund’s Master Prospectus.</p> <p>Investment involves risk and different types of unit trust funds carry different levels of risk. The value of the Fund and its distributions (if any) may rise or fall. These risk factors, among others, may cause you to lose some or all of your investment.</p>
KEY RISKS
<p>WHAT ARE THE KEY RISKS ASSOCIATED WITH THE FUND?</p> <p>Refer to “Risk Factors” in the “Information In Relation to the Fund” section of the Fund’s Master Prospectus.</p>
<p>Credit or Default risk</p> <p>This risk refers to the inability of the issuer of the fixed income securities held by the Fund to make the coupon or principal payments when due. In the event the issuer defaults in the coupon or principal payments, the value of the Fund will be adversely affected.</p>
<p>Counterparty risk</p> <p>The Fund will be exposed to credit risk of the counterparties with whom the Fund trades with. The Fund may place cash deposits, invest in money market instruments, and also enter into derivative contracts for hedging and efficient portfolio management purposes. In the event that the counterparty is not able to fulfil its obligations especially in the event of bankruptcy, this may lead to a loss to the Fund.</p>
<p>Interest rate risk</p> <p>Generally, the value of fixed income securities will move inversely with interest rate movements. Therefore, the value of fixed income securities may fall when interest rates rise and vice versa. Fixed income securities of longer duration tend to be more sensitive to interest rate changes.</p>
<p>Country risk</p> <p>The Fund may be affected by risks specific to the countries in which it invests. Such risks may be caused by but not limited to changes in the country’s economic fundamentals, social and political stability, currency movements and foreign investment policies. These factors may have an impact on the prices of the Fund’s investment in that country and consequently may also affect the Fund’s NAV.</p>

Currency risk
<ul style="list-style-type: none"> As the investments of the Fund may be denominated in currencies other than the base currency, any fluctuation in the exchange rate between the base currency and the currencies in which the investments are denominated may have an impact on the value of these investments. Investors should be aware that if the currencies in which the investments are denominated depreciate against the base currency, this will have an adverse effect on the NAV of the Fund in the base currency and vice versa. Investors should note that any gains or losses arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment. The impact of the exchange rate movement between the base currency of the Fund and the currency of the underlying investments may result in a depreciation of the value of the investments as expressed in the base currency of the Fund.
Income distribution risk
It should be noted that the distribution of income is not guaranteed. The distribution of income is made from realised gains and/or realised income. As such, the Fund may not be able to distribute income if it does not receive such cash flows.
Ratings downgrade risk
The Fund invests in bonds which may be downgraded at any time. If this occurs, there may be adverse price impact on the bonds. However, a downgrade does not necessarily represent a default by the bond issuer. In the event the 40% limit is exceeded, the Manager will rectify such breach within a reasonable period of not more than three (3) months by disposing of the non-rated bonds and/or bonds below investment grade to 40% of the Fund's NAV.
Derivatives risk
The Manager may invest in derivatives for hedging and efficient portfolio management purposes. Derivatives' market values may be subject to wide fluctuations and expose the Fund to potential gains and losses due to mark-to-market value.

Please be advised that if you invest in Units through an Institutional Unit Trust Scheme Adviser (IUTA) which adopts the nominee system of ownership, you would not be considered to be a Unit Holder under the Deed and you may, consequently, not have all the rights ordinarily exercisable by a Unit Holder (for example, the right to call a Unit Holder's Meeting and to vote thereat and the right to have your particulars appearing in the register of Unit Holders of the Fund).
