INVESTORS' LETTER

Dear Valued Investor,

The global equity markets were positive in August 2021 with the developed markets maintaining their uptrend while the Asia-Pacific markets picking up as well. The Standard & Poor's 500 ("S&P 500") and STOXX Europe 600 rose 2.9% and 2.0% respectively while the best performing Asian markets were India (9.4%), Thailand (7.7%) and Malaysia (7.1%). The bond indices gained more grounds with growth of 0.4% to 0.8%. We remain positive on Asian equities on a long-term basis on the broadening of recovery in corporate earnings including financials, industrials, and energy.

We are happy to share that we recently won the Most Innovative New Money Market Fund – Principal e-Cash Fund at the Global Business Outlook Awards 2020. The Fund is available on Malaysia's leading eWallet provider app.

Digital innovation is central to our strategy, as we use data and technology to develop the right solutions for you. MARKET REVIEW (1 MAY 2021 TO 31 JULY 2021)

While inflation moved sharply higher in the US during the month of May 2021, the inflation background is more benign in Mainland, China. Although producer prices saw an increase in the year to end April 2021, this has not fed through to consumer prices. The inflation outcome came against the background of economic growth slowing somewhat but still posting strong gains, driven by growth in retail sales and industrial production. Policy continues to look to strike a balance between maintaining stable growth and preventing financial risk from developing. Interest rates were kept unchanged in May 2021 while new loans extended fell more than expected, reflecting the prudent policy approach.

In June 2021, despite producer prices and some commodity prices rising sharply, consumer prices rose just modestly compared to a year ago. Nevertheless, authorities have taken action to reign in some commodity prices in particular and restrain debt growth. A slowing of overall credit growth in Mainland, China and a number of measures to restrain the property market should see commodity prices ease over the coming months, given Mainland, China's dominance in commodity demand. Other economic indicators have shown growth remaining positive but easing from earlier strong levels, in line with policy objectives for balanced and inclusive growth.

MARKET REVIEW (1 MAY 2021 TO 31 JULY 2021) (CONTINUED)

Domestic developments have been a key driver of relative market performance in July 2021. The news this month that China has banned companies that teach school curriculums from making profits, raising capital or going public is another piece of market unfriendly policy. China's macro policy, both monetary and fiscal, has been much less market friendly than most other major countries recently, while at the same time, there has been a series of investigations into technology firms, the timing of some of which has been market sensitive. This is not a new phenomenon as China has previously looked to cut down excess capacity in manufacturing, cracked down on shadow banking, and implemented various measures in the real estate sector, but the timing of the recent moves and the sectors targeted have generated more adverse market reactions. At the same time, the Delta variant of COVID-19 has seen cases rise in many countries around Asia, though cases are not high in China.

MARKET OUTLOOK*

The outlook is for growth to continue to be supported in China. Policy has been prudent giving the authorities flexibility to support growth with targeted monetary and fiscal policy responses and with measures in particular areas of focus like small and medium enterprises, technology and green development. The recent cut in required reserve requirement ("RRR") shows that the Government is active in supporting economic growth. Inflation has been less of an issue in China than in most other major economies, and this is likely to continue. In terms of the virus and in particular the Delta variant, which has been causing case numbers to rise around the world, China has so far been successful. The positive growth background will be supportive for stock markets after their recent setback, which has left them in negative territory year to date.

We have reduced our equity exposure in the portfolio gradually so far in 2021 and will look to increase exposure to equities again in the months ahead, looking for attractive returns from the asset class over the medium term. In bonds, Chinese yields continue to be attractive globally and, after recent default concerns, credit spreads are extremely attractive for investors who can differentiate between stronger and weaker credits. The stability of the renminbi recently reflects the positive fundamental backdrop for the currency, with higher interest rates than other major currencies, and a current account surplus.

INVESTMENT STRATEGY

The Fund will continue to remain fully invested in the Target Fund with minimal cash kept for liquidity purposes. Our asset allocation decisions will remain subjected towards market conditions.

SOFT COMMISSIONS AND REBATES

Principal Asset Management Berhad (the "Manager") and the Trustee will not retain any form of rebate or soft commission from, or otherwise share in any commission with, any broker in consideration for directing dealings in the investments of the Principal Malaysia Funds ("Funds") unless the soft commission received is retained in the form of goods and services such as financial wire services and stock quotations system incidental to investment management of the Funds. All dealings with brokers are executed on best available terms.

During the financial period under review, the Manager and Trustee did not receive any rebates from the brokers or dealers but the Manager has retained soft commission in the form of goods and services such as financial wire services and stock quotations system incidental to investment management of the Funds.
