Key Risks

General risks of investing in a unit trust fund	
Returns not guaranteed	The investment of the Fund is subject to market fluctuations and its inherent risk. There is NO GUARANTEE on the investment returns, nor any assurance that the Fund's investment objective will be achieved.
General market environment risk	Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the fund's NAV.
Inflation risk	This is the risk that your investment in the unit trust fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.
Manager's risk	This risk refers to the day-to-day management of the fund by the manager which will impact the performance of the fund. For example, investment decisions undertaken by the manager, as a result of an incorrect view of the market or any noncompliance with internal policies, investment mandate, the deed, relevant law or guidelines due to factors such as human error or weaknesses in operational process and systems, may adversely affect the performance of the fund.
Loan financing risk	This risk occurs when you take a loan/financing to finance your investment. The inherent risk of investing with borrowed money includes you being unable to service the loan repayments. In the event units are used as collateral, you may be required to top-up your existing installment if the price of units fall below a certain level due to market conditions. Failing which, the units may be sold at a lower NAV per unit as compared to the NAV per unit at the point of purchase towards settling the loan.
Specific risks of the Fund	
Stock specific risk	Prices of a particular stock may fluctuate in response to the circumstances affecting individual companies such as adverse financial performance, news of a possible merger or loss of key personnel of a company. Any adverse price movements of such stock will adversely affect the Fund's NAV.
Country risk	Investments of the Fund may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of China. For example, if the economic condition of China deteriorates, it may adversely affect the value of the investments undertaken by the Fund in China. This in turn may cause the NAV of the Fund or prices of units to fall.
Credit and default risk	Investment of the Fund may involve a certain degree of credit and default risk when the Fund invests in money market instruments and/or place Deposits. Generally, credit and default risk is the risk of loss due to the counterparty's and/or issuer's non-payment or untimely payment of the investment amount as well as the returns on investment.
Liquidity risk	Liquidity risk refers to the ease of liquidating an asset depending on the asset's volume traded in the market. If the Fund holds assets that are illiquid, or are difficult to dispose of, the value of the Fund will be negatively affected when it has to sell such assets at unfavourable prices.
Currency risk	There are 2 levels of currency risk associated with the investment of this Fund: Currency risk at the Fund level The Fund will invest primarily in the mainland China market that is denominated in RMB. You should note that the RMB is currently not a freely convertible currency as it is subject to foreign exchange control policies and restrictions of the Chinese government. Trading in the RMB may be subject to possible delay in the settlement process. Any devaluation of the RMB could adversely affect the value of your investments in the Fund. Currency risk at the Class level You should also be aware that currency risk is applicable to Class(es) which is in a different currency than the base currency of the Fund. The impact of the exchange rate movement between the base currency of the Fund and the currency denomination of the respective Class(es) may result in a depreciation of the value of your holdings as expressed in the currency denomination of the respective Class(es).
RQFII regime risk	RQFII quota Under prevailing regulations in mainland China, foreign investors who wish to invest directly in the mainland China domestic securities market may obtain the RQFII license approved by the China Securities Regulatory Commission ("CSRC") and obtain investment quota approved by the State Administration of Foreign Exchange ("SAFE"). Principal Malaysia have been granted the RQFII license with a preliminary investment limit of RMB1.6 billion. Subject to the utilisation of the quota and the requirements of SAFE, Principal Malaysia may apply to increase its investment quota, of which is at the discretion of SAFE. You should note that, the Fund's ability to invest directly in China A-Shares through RQFII regime is subject to the RQFII quota of Principal Malaysia. As such, as part of the RQFII investment quota management, we have absolute discretion to suspend the application of units of the Fund when we deem necessary, such as when the utilisation of RQFII quota is approaching its approved quota limit. If the sale is suspended, applications for subscription of units will not be processed and monies received will be returned to you. There may also be circumstances where only partial subscriptions for the day can be accepted for processing due to the availability of quota. In such circumstances, we have the absolute

	discretion to select applications for processing based on our internal practice subject to such application transaction forms being completed. For avoidance of doubt, please note that your submission for application of units through the distributors may not indicate the acceptance for processing by us. For confirmation, you are advised to seek confirmation of transactions through their distributors on the business day after the application is submitted. ▪ RQFII regulation Any changes to the relevant rules and regulations pertaining to the RQFII regime may have an adverse impact on investments made by the Fund. The current RQFII rules and regulations are subject to change from time to time. In the worst case, the RQFII License of Principal Malaysia may be retracted. Under such circumstance, we will seek alternative methods to access the China markets, such as through Stock Connect. Alternatively, if we are of the opinion that this affects the operational efficiency of the Fund, we may deem it no longer viable to operate the Fund, and hence terminate the Fund.

Note: If your investments are made through an IUTA via a nominee system of ownership, you would not be deemed to be a Unit holder under the Deed and as a result, you may not exercise all the rights ordinarily conferred to a Unit holder (e.g. the right to call for Unit holders' meetings and the right to vote at a Unit holders' meeting).
