

TA Asia Absolute Alpha Fund (TAAAAF) - MYR Hedged Class

Information as at 31 January 2022 (based on NAV to NAV with distributions reinvested)

Fund Objective

The Fund aims to generate long term positive return, which includes both capital appreciation and income.

Investor Profile

The Fund is suitable for investors who:-
• have Medium to Long Term investment horizon;
• have a moderate risk tolerance; and
• seek income and capital appreciation.

Investment Strategy

The Fund seeks to achieve its investment objective by investing primarily in equities and equity-related securities in Asia. The remaining of the Fund's NAV will be invested in Liquid Assets.

The investment universe will include, but is not limited to, equities and equities-related securities listed on exchanges in the Asia Pacific region, as well as equities and equities-related securities of companies which have operations in, exposure to, or derive part of their revenue from the Asia Pacific region, wherever they may be listed. The Fund's investment in China "A" Shares listed on PRC stock exchanges may be made through the Stock Connects and/or any other means as may be permitted by the relevant regulations from time to time, for up to 35% of the Fund's NAV.

The Fund may focus on growth companies with sound economic fundamentals to generate alpha (i.e. excess return) through fundamental company and industry research and by applying a bottom-up approach. This approach seeks to identify companies with either proven track records and durable competitive strengths or growth potential that is not fully reflected in the price of its securities. The stock selection process for the investments takes various factors into account, including but not limited to the potential maximum loss under adverse market conditions.

The Fund may use financial derivative instruments for hedging purposes. For example, the Fund may employ currency hedging strategies to hedge the foreign currency exposure to manage the currency risk of the Classes not denominated in the Base Currency.

Although the Fund is actively managed, how active or the frequency of its trading strategy will very much depend on market opportunities.

The Fund may take temporary defensive positions that may be inconsistent with the Fund's strategy in attempting to respond to adverse economic, political or any other market conditions. In such circumstances, the Fund may temporarily hold up to 100% of the Fund's assets in Liquid Assets which may be inconsistent with the Fund's objective and asset allocation strategy as a defensive strategy.

The Fund will invest in markets where the regulatory authority is an ordinary or associate member of the International Organization of Securities Commissions (IOSCO).

The investment management of the Fund has been delegated to an external investment manager, Fullerton Fund Management Company Ltd.
