  - 5.3 Industry Analysis
  - 5.4 Maturity Analysis
  - 5.5 Loan and Advances and Expected Credit Loss (ECL) by sector
  - 5.6 Loan and Advances and Expected Credit Loss (ECL) by geographical
  - 5.7 Movement in Credit Impaired/ Impaired loans and advances
  - 5.8 Movement in allowance for impairment on loan and advances
6. Credit Rating
  - 6.1 Disclosures on credit risk : Disclosure on Risk Weights under Standardized Approach
  - 6.2 Rated Exposures according to Ratings by ECAIs
7. Credit Risk Mitigation
  - 7.1 Disclosure on Credit Risk Mitigation
8. Off-Balance Sheet exposure
9. Market Risk
10. Operational Risk
11. Interest Rate Risk in the Banking Book (IRRBB)

## 1. Introduction

Pursuant to Bank Negara Malaysia's ("BNM") Risk-Weighted Capital Adequacy Framework ("RWCAF"), banking institutions are to make available Pillar 3 disclosure for financial reporting beginning 1 January 2010.

RWCAF is based around three Pillars:

- Pillar 1 requires banking institutions to define rules for the computation of minimum capital requirement for credit risk, market risk and operational risk.
- Pillar 2 requires banking institutions to implement an Internal Capital Adequacy Assessment Process ("ICAAP") for other risks not covered by Pillar 1.
- Pillar 3 requires expanded disclosures to allow market participants to understand the risk profiles of the bank.

The Bank adopts The Standardised Approach ("SA") in computing the capital requirements for credit risk and market risk and adopts The Basic Indicator Approach ("BIA") for operational risk of the Pillar 1 under BNM's RWCAF.

Under SA, standard risk weights are used to assess the capital requirements for exposures in credit risk and market risk. The capital requirement for operational risk under BIA is computed based on average of a fixed percentage of positive annual income over the previous 3 years (equivalent to 12 quarters).

The Pillar 3 disclosure will be published in the Bank's website, [www.boc.cn/malaysia](http://www.boc.cn/malaysia).

## 2. Scope of Application

Bank of China (Malaysia) Berhad ("Bank") is a limited liability company, incorporated and domiciled in Malaysia. The immediate holding company of the Bank is Bank of China (Hong Kong) Limited, which was incorporated in Hong Kong whereas the penultimate holding company is Bank of China Limited and the ultimate holding company is Central Huijin Investment Ltd, both were incorporated in China. The principal activities of the Bank are commercial banking and related financial services.

The Bank has a wholly owned subsidiary company which engaged in non-financial activities and the investment in subsidiary has been deducted from regulatory capital. As the subsidiary company's assets size is not significant in relation to the Bank's assets, there is no separate group consolidation for capital adequacy for regulatory capital reporting. For the purposes of this report, the disclosures presented within will be representative of the Bank entity disclosures only.

The disclosures have been reviewed by internal auditors and certified by Bank of China (Malaysia) Berhad's Chief Executive Officer.

### **3 Capital**

#### **3.1 Capital Management**

The Bank's capital management is guided by the Bank's Capital Management Policy which sets out the key capital management principles, process and responsibilities that the Bank needs to put in place to ensure that the Bank has adequate capital and effective plans to prudently manage the Bank's capital requirement to support the development of business, to meet regulatory capital requirements at all times and to meet the expectations of key stakeholders, including shareholders, investors and rating agencies. Capital Contingency Plan has been put in place where actions to be taken have been specified to address the capital adequacy issue in case the capital ratio falls below warning trigger ratio and Internal Capital Target (ICT) ratio. Both warning trigger ratio and ICT are set for Common Equity Tier 1 (CET1) Capital Ratio, Tier 1 Capital Ratio and Total Capital Ratio.

The objective of the Bank's capital management is to ensure that the Bank maintains sufficient capital at an appropriate level, meeting the requirement of all applicable regulatory standards and guidelines, risk compensation in line within the Bank's risk appetite, business development and return on capital is sufficient to satisfy the expectations of shareholders. In addition, through effective allocation of capital, and capital investment instruments, the Bank strives to continuously enhance its financial effectiveness, improve capital value, and ultimately maximize shareholders' value while controlling risk.

The Board of Director (BOD) shall assume the primary responsibility in ensuring capital is adequate to cover material risks inherent in the Bank by meeting all relevant regulatory standards and guidelines. Meanwhile, the Senior Management shall be responsible for organizing the implementation of capital management in consistency with the Bank's business strategies and risk appetite, ensuring that capital is commensurate with the trend of business development and risk profile, and that various controls are in place.

The Bank's capital management framework covers capital planning, capital contingency plan and capital funding management. Risk Appetite Statement, annual budget and three-year projected business plans with financial projections and capital requirements are approved by the BOD on yearly basis.

Capital adequacy and regulatory capital are closely monitored by Management, employing techniques based on the guidelines of Basel II and the BNM's guideline on Capital Adequacy Framework for supervisory purposes. The information is reported to Management on a monthly basis and to the Board via the interim financial statement on a quarterly basis.

**3.2 Capital Adequacy Ratio**

The total capital and capital adequacy ratios of the Bank are computed in accordance with Bank Negara Malaysia's Capital Adequacy Framework (Capital Components) Policy dated 2 February 2018. The Bank has adopted the Standardised Approach for Credit Risk and Market Risk, and Basic Indicator Approach for Operational Risk.

Pursuant to Bank Negara Malaysia's Capital Adequacy Framework (Capital Components), the Bank is required to hold and maintain the minimum capital adequacy ratios and capital buffers above the minimum Common Equity Tier 1 (CET1) Capital, Tier 1 Capital and Total Capital Ratio.

The capital buffers shall comprise sum of the following:

- a) Capital Conservation Buffer (CCB) of 2.5% phased-in from 2016 to 2019 [2016: +0.625%, 2017: +1.25%; 2018: +1.875%; 2019 onwards : +2.5%]
- b) Countercyclical Capital Buffer (CCyB), determined as the weighted average of the prevailing CCyB rates applied in the jurisdictions in which the bank has credit exposures. (intended to protect the banking sector as a whole from the build-up of systemic risk during an economic upswing when aggregate credit growth tends to be excessive.) (Maximum is 2.50%)

The minimum capital adequacy requirement for year 2018:

CET 1 Ratio (including CCB and CCyB)	6.375% (5.750% in year 2017)
Tier 1 Capital Ratio (including CCB and CCyB)	7.875% (7.250% in year 2017)
Total Capital Ratio (including CCB and CCyB)	9.875% (9.250% in year 2017)

Total CET 1 and Total capital ratio are as follows:

	<u>Dec 2018</u>	<u>Dec 2017</u>
	RM'000	RM'000
CET 1 capital ratio	17.648%	17.016%
Tier 1 capital ratio	17.648%	17.016%
Total capital ratio	34.084%	33.561%

There is no dividend declared and payout in financial year 2018.

## Bank of China (Malaysia) Berhad

The breakdown of risk-weighted assets (“RWA”) by exposures in each major risk category are as follow:

<u>31 Dec 2018</u>	<u>Gross exposure</u> RM'000	<u>Net exposure</u> RM'000	<u>Risk- Weighted assets</u> RM'000	<u>Capital requirements</u> RM'000

### 3.3 Capital Structure

The Bank's regulatory capital is divided into CET 1 and Tier 2 capital.

CET 1 capital consists of share capital, capital reserves, reserves created by appropriations of retained earnings and retained earnings. Tier 2 capital consists of loan loss provisions, revaluation reserves and others. Goodwill, investment in subsidiaries, investments in entities engaged in banking and financial services which are not consolidated in the financial statement, investment properties and investments in commercial corporations are deducted from core and Tier 2 capital to arrive at the regulatory capital.

	<u>Dec 2018</u>	<u>Dec 2017</u>
	RM'000	RM'000
<u>CET 1 capital</u>		
Paid-up ordinary share capital	760,518	760,518
Retained profits	726,128	607,180
Regulatory reserves	16,191	30,067
Fair value through other comprehensive reserve	8,193	-
Revaluation Reserves	-	1,163
	<u>1,511,030</u>	<u>1,398,928</u>
Regulatory adjustments applied in the calculation of CET 1 capital		
-Deferred tax assets	(16,959)	(5,807)
-55% of cumulative unrealised gains of FVOCI financial instrument	(4,506)	-
-55% of cumulative gains of AFS	-	(641)
-Regulatory reserve attributable to loans and advances	(16,191)	(30,067)
	<u>1,473,374</u>	<u>1,362,413</u>
<u>Tier-2 capital</u>		
General Provision*	92,553	71,047
Subordinated loan	1,280,610	1,254,725
Less: Investment in subsidiary	(1,000)	(1,000)
	<u>1,372,163</u>	<u>1,324,772</u>
	<u>2,845,537</u>	<u>2,687,185</u>
<u>Capital ratios</u>		
CET 1 capital ratio	17.648%	17.016%
Tier 1 capital ratio	17.648%	17.016%
Total capital ratio	34.084%	33.561%

\* General provision is subject to a maximum of 1.25% of total credit risk-weighted assets determined under the Standardised Approach for credit risk.

**4. Risk Management**  
**4.1 Risk Management Framework**

Risk Governance

The risk governance of the Group and the Bank are as follows:

Establish and Approve Risk Appetite, Risk Tolerance Limit and Policy, Framework & Governance	Board of Directors (“BOD”)
	Board Risk Management Committee (“BRMC”)
Implementation of Risk Policy, Oversee the effective management of Regulations and Anti-Money Laundering / Counter Financing of Terrorism (AML/CFT) compliance risk, monitoring of risk tolerance	Risk Management and Internal Control Committee (“RMICC”)
	Compliance Risk Management Committee (“CRMC”)
	Senior Management
	Risk Management Department (“RMD”), Anti-Money Laundering Unit (“AML”), Legal & Compliance and Operational Risk Management Unit (“LCO”), collectively known as Risk Management (“RM”)
	Internal Audit Department
Implement and Comply with Risk Policy, assessing and ensuring risk data is correctly retrieved, input, kept current and aligned with the data definitions, monitoring of Risk Tolerance Limit	All the Departments and Branches

The BOD is ultimately responsible for the oversight and management of risks of the Group and the Bank.

RMICC assists the BRMC and BOD in risk management oversight, responsible for review, endorse, approve and, where relevant recommend to the BRMC and BOD, all key decision and recommendations of RMICC including policies, risk appetite and associated limits setting, aligning risk management framework with business strategies and planning, oversee effective implementation of risk management measures, portfolio exposure monitoring, ensuring that infrastructure, resources and systems are put in place for effective risk management activities

Compliance Risk Management Committee (CRMC) is a sub-committee of RMICC with the objective to oversee the effective management and implementation of relevant requirements of the Regulators, Board of Directors and the Management on Regulatory and Anti-Money Laundering / Counter Financing of Terrorism (AML/CFT) compliance risk. The committee also responsible in strengthening the regulatory and AML/CFT

compliance risk management and ensuring Bank's business operations conforming to all relevant laws and regulations and to create a sound compliance culture for the Bank.

The Internal Audit Department is responsible in providing an independent review on Risk Management Framework and to assess the soundness and adequacy of internal controls includes structure, process and policies of the Bank.

The independent Risk Management (RM) provides crucial support to the RMICC, CRMC and BRMC for implementing the risk policies and overseeing the compliance of the various material risks. They are also responsible for monitoring and reporting of risk.

The Business Units are the first line of defense against risk that responsible for identifying, mitigating and managing risk within their line of business to ensure the day-to-day business activities are carried out within the established risk appetite, policies, tolerance, guidelines and procedures.

### Risk Management Approach

Pillar 2 requires the banking institutions to assess their internal capital requirements in relation to their risk profile of their business through the Internal Capital Adequacy Assessment Process ("ICAAP") beyond the capital requirements for credit, operational and market risks under Pillar 1 in a more forward-looking approach.

The Bank's ICAAP is guided by the ICAAP Policy detailing the responsibilities, approaches and methodologies for identifying and measuring risks, stress testing, reporting and review process, capital planning for a 3 year-plans, independent review, and etc. The Bank has undertaken a self-assessment to evaluate the existing capital and risk management practices against the expectations set forth by various stakeholders (e.g BNM, shareholders and etc) as well as business strategies and risk appetite in a forward looking approach.

The internal capital adequacy assessment is stress-tested based on specific stress scenarios, mainly using quantitative analysis, covering main risks across the business lines and taking full consideration of the impact of macroeconomics changes to assess the impact on Bank's capital adequacy.

The Bank has identified the key risks and put in place measurements and control to mitigate those risks and throughout the Bank's risk assessment process and stress testing are employed to ensure that the capital is adequate to cover the risk which are not fully captured under Pillar 1, such as liquidity risk, interest rate risk in banking book and concentration risks. Such information allows senior management to identify adverse trend, take preventive and corrective measures and formulate business strategies.

## **5 Credit Risk**

Credit risk is the risk of financial loss that results from borrower or counterparty failing to perform its contractual obligations. Credit risk arises primarily from lending activities and represents the major risk of the Bank.

The Bank structures the levels of credit risk it undertakes by placing threshold limits on the amount of risk acceptable in relation to single borrower, group of borrowers, industry segments, country, product in addition to limits set for regulatory compliance purpose. Such risks and compliance are monitored on a regular basis and are subject to annual or more frequent review. Limits set by regulator and Parent Bank are adopted by the Bank for managing credit risks.

### **Monitor and Mitigation of Material Risks**

- Prudent customer selection is conducted by business unit who stand as the first line of defense. The Bank has adequate management of credit risk with refining risk appetite, monitoring of key risk threshold limit, enhancing/developing/tighten underwriting standards for various type of lending, strengthening loan monitoring and increase loan portfolio of better risk rating category of “BBB and above”. Weaker rating (below BBB) are adequately mitigated with credit risk mitigants, such as tangible collaterals and guarantees;
- For both Corporate and Retail loan, the Bank applies the 3-in-1 concept of approval process where credit applications are independently assessed by Credit Approval Department and deliberated by the Credit Evaluation Panel (“CEP”), and subsequently submit to CEO for final decision for larger facility limit. For smaller facility limit, credit will be approved by delegated approving authority in Credit Approval Department. Experienced and competent key personnel are appointed to the CEP to assist the CEO in assessing the credit application and major credit decisions, to provide recommendation to CEO for final decision. CEO has the discretion to reject or modify terms and conditions of the loans passed by CEP. For cases which needs Bank of China (Hong Kong) Limited’s (incorporated in Hong Kong) consultation, the Board Risk Management Committee has the veto power to reject credit or modify the terms and conditions which have been approved by the delegated approving authorities.
- The Bank continued to analyze and monitor its credit exposure portfolio and report to Management on a monthly basis through RMICC and to the Board Risk Management Committee and Board of Directors on a quarterly basis.

### **5.1 Past Due and Impaired Loan**

The loans/financing of the Bank is considered past due when the repayment amount due and unsettled on the due date. A loan is considered to be past due when the counterparty

has failed to make principal or interest repayment when contractually due. Loan with more than 90 days past due or any other events occurred is to be classified as impaired as per the Bank policies.

The classification of impaired loans/financing and provision of the Bank for loans/financing impairment is consistent with the standard under Malaysian Financial Reporting Standards 9 (“MFRS9”) and BNM Guidelines on Financial Reporting.

The loans/financing (“loan(s)”) of the Bank are classified as impaired when they meet the following criteria:

- i. where the principal or interest or both of the loan is past due for more than 90 days or 3 months. In the case of revolving facilities, (e.g. overdraft facilities), the facility shall be classified as impaired where the outstanding amount has remained in excess of the approved limit for a period of more than 90 days or 3 months; or
- ii. where the amount is past due or the outstanding amount has been in excess of the approved limit for 90 days or 3 months or less and the loan exhibits weaknesses in accordance with Bank’s Credit Risk Measurement Framework that would render the account as impaired; or
- iii. Where repayments are scheduled on intervals of 3 months or longer, the loan/financing is classified as impaired as soon as a default occurs; or
- iv. when the loan is classified as rescheduled and restructured in the Central Credit Reference Information System (CCRIS) in accordance with regulatory requirements.

With effect from 1 January 2018, the Bank has adopted MFRS9 which introduces a forward-looking expected credit loss (ECL) model on impairment. The Bank applies a 3 stages approach to measuring ECL as follows:

#### Stage 1 - 12 months ECL

- For credit exposures where there has not been a significant increase in credit risk since initial recognition and that are not credit impaired upon origination, the ECL associated with the probability of default events occurring within the next 12 months will be recognised.

#### Stage 2 – Lifetime ECL

- For credit exposures where there has been a significant increase in credit risk since initial recognition but that are not credit impaired, the ECL associated with the probability of default events occurring within the lifetime ECL will be recognised.

#### Stage 3 – Lifetime ECL

- Financial assets are assessed as credit impaired when one or more objective evidence of defaults that have a detrimental impact on the estimated future cashflows of that asset have occurred.

The MFRS9 ECL Methodology for Stage 1, 2 & 3 Financial Assets has independently validated by external auditor.

## 5.2 Geographical Analysis

Geographic distribution of credit exposures, broken down in geographical location where the credit risk resides by major types of gross credit exposures

31 December 2018

Credit exposure Asset Class	Geography				Total
	Malaysia	China	Hong Kong	Other

Transferred to 12 months ECL	3,663	(3,663)	-	-	-	-
Transferred to lifetime ECL not credit impaired	(4,176)	4,176	-	-	-	-
Transferred to lifetime ECL credit impaired	(23)	(216)	239	-	-	-
New loans ECL	5,595	1,886	-	-	-	7,481
Provision/reversal during the year	(11,188)	7,421	4,650	-	-	883
Full settlement	(5,275)	(2,731)	-	-	-	(8,006)
Amounts written off	-	-	(26,667)	-	-	(26,667)
<b>Total ECL amount as at 31 December 2018</b>	<b>18,052</b>	<b>52,089</b>	<b>32,044</b>	-	-	<b>102,185</b>

\*The opening balance for the collective impairment allowance measured under MFRS 139 is now presented as 12-months and lifetime expected credit losses following the adoption of MFRS 9, with no restatement to prior period comparatives.

**6. Credit Rating**

Under the standardized comprehensive approach, the Bank make use of credit rating assigned by External Credit Assessment Institutions (“ECAIs”) that are recognized by BNM in its calculation of credit risk weighted assets for capital adequacy purposes.

The following are the rating agencies or eligible External Credit Assessment Institutions (“ECAIs”) rating used by the Bank:

- a) Standard & Poor’s (“S&P”)
- b) Moody’s Investor Service (Moody’s)
- c) Fitch Rating (“Fitch”)
- d) RAM Rating Services Berhad
- e) Malaysian Rating Corporation Berhad (“MARC”)

Disclosures on Rated Exposures according to Ratings by ECAIs.

**7. Credit Risk Mitigation**

The Bank is granting the credit facilities based on the credit standing of the customer, legitimate loan purpose, source of repayment, debt servicing ability and collateral(s)/ guarantees/ etc as the credit risk mitigant(s) (CRM). The credit facilities may be granted unsecured premised on the merit of the customer’s credibility.

The main types of tangible collateral obtained by the Bank to mitigate credit risk are as follows:

No	Types of Collaterals
1	Fixed Deposits, Cash Margin
2	Residential Property
3	Non-Residential Property (e.g. shop, factory, warehouse, land and etc.)
4	Quoted Shares
5	Counter Guarantee by Financial Institution

The Bank also accepts guarantees from individuals, corporate and institutional customers to mitigate credit risk subject to internal guidelines on eligibility.

Valuation report of property by panel valuer is required by the Bank to ensure the value is fair unless is exempted by the Bank. Generally, the value of the property charged is updated during the periodic credit review to reflect the current market value.

For the computation of capital adequacy requirements for collateralized transactions, the Bank has since in August 2013 applied **comprehensive approach**, which allows greater offset of CRM against exposures, by effectively reducing the exposure amount by the value ascribed to the collateral. This is guided by the minimum conditions for the eligible collaterals set out in the “Risk-Weighted Capital Adequacy Framework (Basel II – Risk-Weighted Assets Computation) issued by BNM.

## 8. Off-Balance Sheet Exposure

Off-Balance Sheet exposures of the Bank are mainly composed of the following:

- Bank Guarantee and Standby Letter of Credit, which represent undertakings that the Bank will make payment in the event that a customer cannot meet its obligations to third parties.
- Documentary Letter of Credit, which are undertaking that the Bank on behalf of the customer for payment of goods purchased.
- Commitments to extend credit including the unutilized or undrawn portion of credit facilities.

Off-Balance Sheet and Counterparty Credit Risk – 31 December 2018

Other commitments , such as formal standby facilities and credit lines, with an original maturity of up to one year	1,749,285	349,857	303,756
Other commitments, such as formal standby facilities and credit lines, with an original maturity of over one year	251,208	125,604	114,359
<b>Total</b>	<b>4,724,674</b>	<b>1,766,902</b>	<b>1,515,277</b>

## 9. Market Risk

Market risk is the risk of potential losses resulting from the adverse movement in the value of assets and liabilities (including off-balance sheet assets and liabilities) due to fluctuations in the risk factors such as foreign exchange rates, interest rates, credit spreads, equity prices, commodities prices and their associated volatility.

At Management level, the Bank's Risk Management and Internal Control Committee (RMICC) is responsible for the oversight of market risk management of the Bank and executing the Board Risk Management Committee (BRMC) and Board's mandate on market risk management strategies, risk appetite and tolerance level. The Bank has established the Market Risk Management Policy to govern BOCM's market risk governance structure, risk identification, measurement, monitoring and reporting processes. BOCM's market risk is managed by the Risk Management (RM). RM

currently measures and monitors its FX Net Open Position (FX NOP), Value-at-Risk (VaR), Price Value of Basis Point (PVBP) and stop loss limits (Daily, Monthly and Yearly) on daily basis. RM also reports to RMICC on monthly basis on the Bank’s market risk exposures and its compliance to the limits approved for each market risk indicators.

For capital requirement, the Bank adopts the Standardised Approach. The current market risk capital charge is from the Bank’s exposures in the foreign exchange risk

Risk weighted assets and capital requirement for market risk

Capital Charge Requirement for :	31 Dec 2018	31 Dec 2017

**10. Operational Risk**

Operational risk refers to the risk of loss resulting from inadequate or failed internal processes, people and systems, or from external events. Operational risk is inherent in all activities, products and services of financial institutions and can transverse multiple activities and business lines within the bank. It includes a wide spectrum of heterogeneous risk such as fraud, physical damage, business disruption, transaction failures, legal and regulatory breaches as well as employee health and safety hazards. Operational risk may result in direct financial losses as well as indirect financial losses (e.g. loss of business and market share) due to reputational damage.

To manage operational risk, the Bank has established “Three lines of defense” to manage operational risk events, where:-

1. First line of defense – Business and functional lines are primarily responsible in managing operational risk of their respective businesses and functions.
2. Second line of defense – perform reviewing and identification and management of major operational risk by business and functional lines as well as integrating operational risks at the enterprise level.
3. Third line of defense – provide regular reviews and assessments of the operational risk management framework, processes and systems.

Risk Management and Internal Control Committee (“RMICC”), Compliance Risk Management Committee (“CRMC”), and Board Risk Committees (“BRC”) are the Bank’s risk governance committees accountable in overseeing the enterprise wide operational risk function. The committee is responsible to monitor and deliberate on operational risk issues specific to the business or functional lines, and promote risk ownership and management by the business and functional lines.

For capital requirement, the Bank has adopted the Basic Indicator Approach (“BIA”), the approach is in line with Bank Negara Malaysia Guidelines where the calculation is based on average of a fixed percentage of positive annual gross income over the previous three years.

	31 December 2018 (RM’000)	31 December 2017 (RM’000)
Minimum Capital required for Operational Risk	40,794	36,547
Total Risk Weighted Assets Equivalent for Operational Risk	509,932	456,835

#### 11. Interest Rate Risk in the Banking Book (IRRBB)

IRRBB is defined as the current and potential risk to the Bank’s earning and economic value arising from movement of interest rates.

The table below illustrates BOCM IRRBB under a 100 basis point parallel interest rate shock from earning and economic value perspective.

As at 31 December 2018:

Currency	Earnings	Economic Value
	In Thousands	In Thousands
All Currencies (in MYR)	+/- 50,505	+/- 107,427
USD	+/- 12,262	+/- 87,917
CNY/CNH	+/- 476	+/- 385

As at 31 December 2017:

Currency	Earnings	Economic Value
	In Thousands	In Thousands
All Currencies (in MYR)	+/- 48,581	+/- 103,680
USD	+/- 13,257	+/- 88,526
CNY/CNH	+/- 682	+/- 512
